

customwallpaper

peel-and-stick standard. smooth & textured.

The industry's leading choice for peel-and-stick wall-graphic material, our phthalate-free flexible vinyl is a tough polymeric PVC film that's resistant to abrasions, oils, chemicals, and some solvents. Coated with our proprietary adhesive—a unique water-based formulation that works great on surfaces such as painted drywall, sanded wood (w/o lacquer), and most any non-textured or non-porous wall—this material is perfect for home or commercial applications that require both superior tack and clean removability.

facestock: phthalate-free flexible vinyl.

- Excellent choice for repositionable wall graphics, appliques, point-of-purchase solutions, or temporary outdoor signage
- Peel-and-stick thickness comes in 6.0 mil for smooth and textured
- For murals only, there is a 1/2" overlap on all sides
- Wallpaper panels are 25" wide times the height of your wall
- NFPA Class A tested and approved fire certification

adhesive: removable/repositionable system.

- Works great on a variety of surfaces such as painted drywall, glass, metal, sanded wood (w/o lacquer), and most any non-textured or non-porous wall
- The minimum application temperature is 20°F, with a service temperature range of -10°F to 120°F
